php developer

sep 2024 join

Skydot Infotech

- a passionate PHP Developer currently working at Skydot Infotech. I work on dynamic projects using PHP and WordPress, while also exploring Photoshop for creative design tasks and learning the basics of Laravel. I am dedicated to creating efficient, user-friendly, and visually appealing web solutions.

Frontend PHP Intern

May 2024 – sep 2024

I Vision Infotech – Ahmedabad

- Developed responsive and user-friendly web pages using HTML, CSS, Bootstrap, and JavaScript.
- Assisted in backend development with PHP and MySQL to build dynamic web applications.
- Collaborated with senior developers to debug, test, and improve application performance.
- Gained hands-on experience in integrating AJAX and jQuery for interactive UI elements.

Publications

July 2024

“Getting Started with PHP for Beginners” – Medium Article, July 2024

“Building Responsive Layouts with Bootstrap” – LinkedIn Blog, August 2024

Projects

Wedding Management System

- Developed a dynamic web-based application for managing wedding vendors, bookings, customer inquiries, and event packages.
- Implemented modules for user registration, admin dashboard, gallery, contact form, and customer reviews.
- Used PHP and MySQL for backend logic, with HTML, CSS, Bootstrap, and JavaScript for frontend UI.
- Tools Used: PHP, MySQL, HTML, CSS, Bootstrap, JavaScript

WordPress PHP Live Projects

- Built and customized multiple dynamic websites using WordPress, including fully functional e-commerce platforms with payment integration.

- Developed backend admin panels for training management systems using PHP and MySQL, supporting modules like user management, batch scheduling, and report generation.
- Collaborated on live projects involving real-time data handling, user authentication, and responsive UI.
- Tools Used: WordPress, WooCommerce, PHP, MySQL, HTML, CSS, JavaScript

Technologies

Languages: HTML, CSS, JavaScript, PHP, SQL
