Institute

As an Adobe Certified Professional Developer, I have built a strong foundation in Magento 2 development and expanded my skills in delivering high-quality, customized eCommerce solutions. With in-depth knowledge of the Magento 2 platform, I have successfully developed, extended, and optimized Magento 2 solutions to meet complex business needs. I specialize in advanced performance optimization, API integrations, and secure coding practices, ensuring robust and scalable implementations across diverse projects. My expertise allows me to provide tailored solutions that enhance business operations and customer experiences.

Work Experience

Magento Developer | 2022-01 – Current

Magneto IT Solutions, Ahmedabad

- Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Designed customized solutions for proposals to potential customers.
- Engaged in client communication to understand business needs and deliver tailored technical solutions.

Technical Skills

- Building highly specialized and optimized modules.
- API Integrations - Working with REST API for external system integrations.
- Performance Optimization - Optimizing database queries, code, and improving speed.
- Magento 2 Security Best Practices - Secure coding, and access controls.
- Customizing front-end layouts and templates for specific business needs.
- Advanced Troubleshooting and Debugging - Identifying and resolving complex issues within the Magento ecosystem.
- Multi-store, Multi-language Setup - Managing multiple stores with different languages or currencies.
- Experience with the Magento 2 framework and its architecture.
- Familiarity with Magento 2 extensions and integration of third-party modules.
- Data migration and upgrade experience of Magento 2 versions.
- Knowledge of Magento 2 backend administration and configuration.
- Version control system like Git.
