---

EXPERIENCE SUMMARY

Professional experience of 8+ years in working with Web technologies like PHP, Javascript, Laravel, CodeIgniter, Reactjs, HTML, Css, Web hosting, Google / Firebase APIs, GIT.

SKILLS

Technical Skills: PHP, Laravel, JavaScript, Reactjs, MySQL, PostgreSQL, MongoDB, HTML, CSS

Tools: Git, PhpMyAdmin, PGAdmin, WorkBench, VS Code

Cloud: AWS (EC2, RDS, S3), Firebase, DigitalOcean

AREAS OF EXPERTISE

- Strong technical expertise in PHP and Laravel, with proficiency in developing scalable web applications, RESTful APIs, and backend services.
- Deep understanding of MVC architecture and design patterns, ensuring clean and maintainable code.
- Proficiency in MySQL, including database design, query optimization, and indexing for high-performance applications.
- Frontend expertise with HTML, CSS, JavaScript, and modern frameworks like Bootstrap CSS for UI development.
- Knowledge of Reactjs and have experience building responsive, interactive user interfaces using functional components, hooks, and React Router.
- Hands-on experience with third-party API integrations such as payment gateways (Razorpay, Stripe), social logins (Google, Facebook), and email services.
- Knowledge of deploying and managing applications on AWS, DigitalOcean, Shared Hosting(like Hostinger) and handling server configurations with Nginx.
- Knowledge of caching strategies using Redis and performance optimization techniques for scalable web applications.

EDUCATION

TCET, Rajkot, Gujarat | Bachelor's Degree in Computer Engineering | July 2012 to May 2015

Government Polytechnic, Waghai, Gujarat | Diploma in Computer Engineering | July 2009 to May 2012

EXPERIENCE

Sr Web Developer - Quantum Paper | January 2022 - March 2025

- Manage the full lifecycle of e-commerce platforms, APIs, and in-house applications, ensuring seamless front-end and back-end integration.
- Optimize server performance and implement innovative technologies to enhance functionality and drive business growth.

- Collaborated with freelancers to streamline project execution and improve efficiency.

Sr Developer - I verve Infoweb Pvt Ltd | January 2019 - December 2021

- Design and build scalable, secure PHP applications while ensuring modern architecture practices.
- Mentor junior developers and conduct thorough code reviews to maintain high coding standards.
- Enforce development best practices and continuously improve application performance and security.

PHP Developer - Krypton Inc | August 2016 - December 2018

- Develop and maintain web applications, optimize database performance, and integrate APIs.
- Troubleshoot technical issues and oversee the full software development lifecycle.
- Ensure effective version control, deployment, and adherence to best practices.

RECENT PROJECTS

Quantum Paper - Backend and API Development

- Developed backend APIs for authentication, pro app validation, and core functionalities.
- Created a responsive web view using HTML, CSS, and Bootstrap for seamless app activation.
- Built publisher and admin panels for activation codes, user roles, payments, and reports.
- Implemented payment code management, subscription access, and advanced reporting.
- Resolved technical issues and maintained API documentation for scalability.

Quantum Paper Store - Frontend and Backend Development

- Integrated a responsive HTML theme for seamless desktop and mobile experiences.
- Implemented Razorpay for secure payment processing and transaction monitoring.
- Developed core eCommerce features like book listings, purchase flow, search, and OTP-based login.
- Managed third-party integrations, including shipping partners, for efficient order fulfillment.
- Handled customer support issues and ensured optimal server performance and security.

Quantum Paper Quiz- Frontend, Backend and API Development

- Developed APIs for seamless integration with the React Native app, ensuring efficient data flow.
- Built a web version of the quiz platform with core mobile app features.
- Designed an admin panel for managing users, quizzes, results, and Pro activations.
- Managed freelance resources to optimize productivity and project execution.
- Troubleshoot issues, refined API functionalities, and optimized server architecture for scalability.

Telecalling Panel- Frontend and Backend Development

- Developed all features, ensuring seamless functionality for internal support operations.
- Designed and implemented key modules, including user profiles, institute management, pincode

tracking, and call log management.

- Built a robust reporting system for performance analytics and decision-making.
- Coordinated with the support team to address issues, gather requirements, and provide technical support.
- Managed server deployment, maintenance, and optimization for reliability and smooth operation.
- Continuously improved workflows and features based on team feedback.
