WORK EXPERIENCE

Software Engineer

Kitchen365

02/2024 - 05/2025

Ahmedabad

Kitchen365 is a premier web agency focused on delivering e-commerce solutions for the kitchen cabinet and bath industry, helping businesses grow through an innovative platform and proven digital marketing strategies.

Achievements/Tasks

Started as Trainee Software Engineer

Achievements - Optimized US Cabinetry workflows in 2024, improving platform performance and usability. - Advanced OMS development through innovative R&D, supporting Kitchen365's e-commerce roadmap.

Task :- Prime Cabinetry Project - Developed a Magento 2 tool to update Sample Door Vendor Names, enabling real-time vendor accuracy for clients. - Added Sales Order Number (SO#) tracking for Homemark Orders, streamlining order fulfillment processes. - Fixed Woodhood product bugs, enhancing display and usability for a seamless shopping experience.

US Cabinetry Project - In the US Cabinetry project, I built a mass delete feature for quotes in Magento 2, making sales management more efficient. I integrated a universal SKU system to ensure consistent product details across the marketing site and revamped the Resources Page with an interactive flipbook. To boost organic traffic, I created SEO-optimized event pages. I also enhanced Google 2FA security by refining the reset logic, clearing email fields, and disabling the "Send" button when unnecessary. Additionally, I improved user experience by adding an optional phone number field and refining Specbook details for better clarity and flexibility.

OMS (Order Management System) - Conducted R&D on product options, prototyping features to enhance order customization scalability.
