

Divyesh Parmar

Jr iOS Developer

✉ parmardivyesh2004@gmail.com ☎ 7984958953 🌐 [Linkedinprofile](#)

To secure a role as an iOS developer in a dynamic organization where I can learn and grow while utilizing my knowledge of mobile app development and passion for creating user-friendly interfaces.

Experience

Magic Technolabs Pvt. Ltd

OCT-2023-Till Date

- Integrated Traccar GPS tracking system into iOS applications, enabling real-time location monitoring and data management.
- Implemented Firebase services for user authentication, real-time database synchronisation, and cloud storage within iOS projects.
- Troubleshoot and resolved integration issues, ensuring seamless data flow between Traccar and Firebase, enhancing app stability and performance.
- Utilized Firebase Crashlytics to monitor app crashes and improve user experience by addressing real-time errors post-integration.

Softs Solution Services

NOV-2022 – SEP-2023

- Worked on framework Cocoa touch
- Creative design
- Networking(API)
- Develop project concepts and maintain optimal workflow.
- Added animation between UI Views for smooth transition and better user experience, Carry out quality assurance tests to discover errors and optimize usability.
- Transitioned from a 3-month internship into a full-time role, optimizing project workflows and ensuring high-quality app performance through rigorous testing.

Agile Academy | (Trainee)

JULY-2022 – OCT-2022

- Worked on framework Cocoa touch
- Worked with Backend team to display the correct data format in devices
- Develop project concepts and maintain optimal workflow.
- Added animation between UI Views for smooth transition and better user experience, Carry out quality assurance tests to discover errors and optimize usability.

Education

High School

2018 - 2019

Gujarat Technological University | (Diploma in Computer Engineering)

2019 – 2022

- CGPA : 7.46

Skills

- Application Design
- Swift 5
- Firebase
- Cocoapod
- Networking (API)
- Traccar
- UIKit
- Build Releases
- Communication
- Sqlite
- Firebase Crashlytics
- FirebasePush notification

Projects

Video EditorCrop and Mute

[AppLink](#)

- Designed and developed key UI/UX components for the "Video Editor - Crop and Mute" app, enhancing the overall user interface and user interaction.
- Integrated video merging functionality into the app, enabling users to combine multiple video clips seamlessly.
- Resolved critical bugs and optimised performance, contributing to a more stable and responsive application.
- Collaborated with the development team to implement new features and improve existing ones, ensuring a high-quality user experience.

Pushmebaby (MacOS)

[AppLink](#)

- Designed and implemented user interface enhancements for the "PushMeBaby" app, focusing on improving user experience and visual appeal.
- Managed and optimised the app's database, ensuring efficient data storage and retrieval, resulting in improved app performance.
- Identified and resolved critical bugs, leading to increased app stability and a smoother user experience.
- Collaborated with a cross-functional team to deliver feature updates and maintain the app, ensuring it meets high standards of quality and reliability.

RTC Rider App

- The RTC Rider App is a convenient and user-friendly mobile application designed to enhance the commuting experience for public transit users. With real-time tracking, route planning, and schedule information, the app helps riders navigate the public transportation system efficiently.
- Real-Time Bus Tracking Provides users with up-to-the-minute location updates of buses, ensuring accurate arrival times and reducing wait times at stops. Route Planning Allows users to plan their trips by selecting the best routes, viewing alternate paths, and optimising their journey based on current transit conditions.
- Schedule Information Offers detailed schedule data for all bus routes, including departure and arrival times, helping users plan their travel more effectively.
- Notifications and Alerts Sends notifications for bus arrivals, service disruptions, or delays, keeping users informed and minimising travel inconvenience. Favorites and Saved Routes v Enables users to save their frequently used routes for quick access, streamlining the process of checking bus schedules and tracking.

Amitaly

[AppLink](#)

- Worked on enhancing the Amitaly iOS app by implementing API integrations and optimizing API call handling for improved performance and reliability.
- Performed minor bug fixes and code refactoring to resolve crashes, UI glitches, and improve overall app stability across devices.
- Contributed to design improvements by updating layouts, enhancing user interface elements, and aligning the app's look with modern design standards.
