Photography

OBJECTIVE

Focused on PHP development for E-commerce, FinTech and Transportation Oil & Gas sectors. Experienced in building high-performance applications with seamless integrations and optimized workflows. Delivered solutions for top ranking US and UK-based platforms, efficiency, and business impact.

EDUCATION

Bhusan High School	2017
SSC	80/100(%)
Marwadi Education Foundation	2019 - 2023
B. E. - Computer Engineering	8.61/10 (CGPA)
Raj School of Science	2019
HSC	71/100(%)

WORK EXPERIENCE

AVI Web Solutions - Software Developer **July 2022 - April 2024**

- Developing end-to-end web applications using Laravel and Magento with a focus on clean architecture and performance. Skilled in Blade templating and efficient data handling using SQL and Eloquent ORM.

Zava Innovations - Full Stack Web Developer **May 2024 - Present**

- Specialized in full-stack web development using Laravel, ReactJS, and WordPress, with a focus on scalable architecture, testing, and deployment. Experienced in building dynamic UIs with blade and managing using eloquent and optimized SQL.

PROJECTS

1stopbedrooms - E-commerce project

- Developed a shopping website using Laravel and ReactJS with role-based access, secure middleware, and custom APIs. Built a dynamic seller dashboard with product management, PayPal integration, and performance optimizations through query tuning and caching.
- Also contributed to top-ranking US-based platforms by delivering efficient, scalable solutions tailored to client needs.

TelConnect - Self-Service Platform

- Developed a telecom self-service platform using Laravel and ReactJS, enabling secure user authentication and modular API integrations. Built dynamic dashboards for billing, SIM activation, and package upgrades with performance enhancements through queue handling and caching strategies.
- Contributed to enterprise-scale deployment with high-availability features and seamless UX under heavy traffic.
