

VARSHAL TALSANIYA

Magento Developer

+91 8469372803 • varshal2411@gmail.com •

Summary

Dedicated Magento Developer with a strong background in custom module development, bug fixing and active contribution to the Magento open-source community through pull requests and issue tracing. Seeking challenging opportunities to apply technical expertise, support organizational objectives, and foster continuous professional growth in a dynamic development environment.

Experience

Salecto India Pvt. Ltd.

Ahmedabad

Jr. Magento Developer

06/2022 - Present

Innovative Magento Developer with 3+ years of experience in web development and maintenance.

- Developed custom Magento modules to extend functionality, improve performance, and align with business objectives.
- Created the Missing_Page module to track 404 URLs, providing a graphical representation for analysis and implementing redirections to relevant product, category, CMS, and custom pages.
- Developed the Store_Switcher module, enabling users to switch stores seamlessly across product, category, CMS pages, and the homepage. Additionally, created a widget for efficient management and customization.
- Built a referral form menu feature to enhance merchant referrals, improving customer engagement and acquisition rates.
- Developed the Data_Integrity module to resolve migration issues, addressing data corruption, whitespace SKU problems, and double-dot extension image errors, etc.
- Developed API endpoints for order and customer management, enabling seamless data exchange and integration with third-party systems.
- Integrated REST APIs with third-party payment gateways and shipping providers to enhance Magento's capabilities.
- Ensured Magento version compatibility by updating company modules for Magento 2.4.5, 2.4.6, and 2.4.7.
- Integrated and optimized third-party extensions, improving operational efficiency and system performance.
- Installed security patches and custom extensions while implementing design improvements and functionality enhancements.
- Identified, analyzed, and resolved bugs in Magento modules and themes, ensuring smooth operation.
- Actively contributed to the Magento community by creating PRs and reporting issues, with one PR successfully merged into the Magento development branch.
- Monitored and troubleshooted frontend and backend errors, analyzing logs for performance optimization.
- Created detailed bug reports and solutions for third-party extension vendors to improve module reliability.
- Conducted cross-browser and cross-platform testing, ensuring module responsiveness and usability.
- Performed quality assurance (QA) testing to validate new functionalities, ensuring an optimal user experience.
- Gained expertise in debugging and code review, acting as a backend team code reviewer, identifying areas for improvement and ensuring high-quality code standards.
- Contributed to coding policy development, ensuring best practices for efficient code accessibility and maintainability.
