Summary

Experienced Magento 2 developer at Digit Software Solutions (DSS) with additional expertise in ReactJS for PWA development.

Work Experience

Designation

Dec 2023 - present

Before joining Digit Software Solutions (DSS), I actively participated in projects where I gained valuable hands-on experience. Even prior to officially becoming part of the team, I was entrusted with tasks involving debugging and enhancing functionalities within ongoing projects. One notable responsibility was implementing pricing filtration features in Magento, where I demonstrated my ability to analyze requirements, troubleshoot issues, and deliver effective solutions. These experiences not only honed my technical skills but also provided me with a deeper understanding of real-world project dynamics and client expectations. Additionally, I learned React during this time, further enriching my skill set.

Skills

Languages	JavaScript, HTML, XML, SQL, PHP, C, C++, Ajax, jQuery, knockoutjs, Redux, React JS,
Database Technologies	MySQL, SQL Server
APIs	Rest API, GraphQL
Tools / Frameworks	CSS, Bootstrap, JSON, React Hooks, Magento 2, PWA
Soft Skills	Communication, Teamwork, Problem Solving

Projects

API Customization for Mio-Moda E-commerce

Project Information: I worked on the Mio-Moda e-commerce site, which serves customers in the United Kingdom. My role primarily involved managing the backend processes through various APIs. These APIs facilitated tasks like user login, product purchase for registered users, and even guest checkout. While Magento offered default APIs, I collaborated with the client to customize and enhance these APIs based on their specific needs. Additionally, I developed new APIs to further streamline operations. One interesting aspect of this project was managing multiple stores within certain countries using APIs.

Implementation Language: PHP, REST API

Role: Backend Developer

Worked with: Magento, API customization, Client collaboration

Project Detail: Customizing Magento APIs for smoother user experiences and creating new APIs to meet specific business requirements, particularly focusing on multiple store management within certain countries.

DS Car E-commerce: Product Page Enhancements

Project Information: I worked on the DS car e-commerce site, focusing on the product page functionality. This site caters to customers interested in purchasing cars, particularly emphasizing filtering options based on price and accessories. My primary responsibility revolved around managing the backend processes and implementing features using PHP and knockoutjs.

Implementation Language: PHP, Knockoutjs

Role: Front-end Developer

Worked with: Product page development, Filtering functionalities, Knockoutjs integration

Project Detail: Enhancing the product page of the DS car e-commerce site to include filtering options for both final price and monthly installment price. Additionally, implemented filtering for car accessories price using PHP and Knockoutjs.

Custom Magento PWA: React and GraphQL Implementation

Project Information: Utilizing React, CSS, and HTML alongside GraphQL, our team is crafting a bespoke Magento PWA site. This project encompasses customizing the frontend experience, ensuring seamless navigation, and enhancing the product page for optimal user engagement and conversion

Implementation Language: ReactJS, CSS, GraphQL

Role: Front-end Developer

Worked with: Override Magetno 2 PWA and crate new ui and product page.

Project Detail: Crafting a custom Magento PWA using React, CSS, and HTML, integrated with GraphQL for seamless data retrieval. As the front-end developer, responsibilities include enhancing the UI/UX, optimizing navigation, and redesigning product pages to boost user engagement and conversion rates. Collaborated to override Magento 2 PWA and develop new UI elements and product page functionalities.

Education

2019/20 – 2021-22	Bachelor Of Commerce Degree Akhand Anand Arts and Commerce Collage (Veer Narmad South Gujarat University)
2019	12th (Commerce) Ashadeep School
2017	10th P.P. Savani School
