PROFILE

Manual QA Engineer with 3 years of hands-on experience in functional, regression, smoke, and UI testing of Mobile, web and desktop applications. Proficient in writing test cases, reporting bugs, collaborating across teams, and ensuring end-to-end product quality. Experienced in testing ad monetization and subscription-based flows in a fast-paced Agile environment. Gaining practical knowledge in API testing using Postman and automation testing using Selenium, Java, and TestNG. Known for being a detail-oriented, fast learner with strong communication skills and on-site collaboration experience.

TECHNICAL SKILLS

Functional Testing	Mobile & Web Testing	Accessibility Testing
Regression Testing	Smoke Testing	Compatibility Testing
Requirements Analysis	Creating Test Cases	Selenium, Java
Test Execution	Agile Methodologies	HTML, CSS, UI

PROFESSIONAL EXPERIENCE

Sep 2022 - Present

Test Engineer, Tech Mahindra

- Executed test cases and scenarios for web and desktop applications.
- Trained and mentored junior testers, sharing QA best practices.
- Performed smoke, sanity, regression, UI, and ad-hoc testing.
- Created, reviewed, and maintained test cases and test data.
- Raised, tracked, and verified bugs in Task Tool (similar as JIRA).
- Conducted compatibility and accessibility testing across browsers/devices.

PROJECT EXPERIENCE

Project: Ad Monetization Platform

Domain: AdTech / Digital Advertising

- Working on an ad monetization platform where I test various ad formats for proper UI rendering, functionality, and event tracking (clicks, impressions, actions).
- Responsible for validating the display and behavior of multiple ad types (banner, video, interactive), ensuring the UI/UX meets business and technical requirements.
- Leading the testing of a subscription-based feature that allows users to remove ads after payment—similar to an ad-free user experience.
- I serve as the main point of contact (POC) for this feature, handling all QA responsibilities including coordination with the on-site team.
- Performed thorough regression, smoke, and UI testing on each build, along with new feature testing as part of every sprint.
