SUMMARY

MERN Stack Developer with 1+ years of experience in building and deploying scalable, full-stack web applications using **React.js, Node.js, Express.js, and MySQL**. Proficient in developing **RESTful APIs**, enhancing **application performance**, and integrating **third-party services** to deliver seamless, user-focused experiences. Strong grasp of **modern JavaScript, component-based architecture**, and **backend logic design**.

WORK EXPERIENCE

Junior Software Engineer, Radicalrack Technologies Pvt. Ltd 12/2023 – Present
Ahmedabad, India

- **PWA & Admin Panel Development:** Built scalable PWAs with admin dashboards for food and labor platforms, ensuring performance and usability.
- **CMS Implementation:** Developed custom CMS solutions for efficient content updates and site management.
- **Optimization & API Integration:** Improved app performance, secured authentication, and integrated third-party APIs.

PROJECTS

Restaurant Back Office Management

- **System Development:** Built a robust Restaurant Back Office Management System using **React, Node.js, Express, MySQL (Sequelize)**, with secure file uploads via **Azure**, enabling efficient management of menu items and employee records.
- **Operational Efficiency:** Streamlined business workflows with an interactive dashboard for **earnings tracking** and **feedback analysis**, improving decision-making and operational visibility.

TaskPro

- **PWA Development:** Built a feature-rich PWA using **React, Node.js, Express, and MySQL** with **Socket.io** for real-time chat, **Stripe** for payments, and **Twilio** for OTP. Integrated **Azure uploads** and **Firestore notifications**.
- **Admin Panel:** Developed a robust admin panel for managing users, tasks, and operations, ensuring efficient platform control.
