- I have learnt Dynamic Web Page Designing Using ReactJS.
- **Bug Fixing** : Identified and resolved bugs, improving application performance and stability.
- **Skills** : Understanding of RESTful APIs and asynchronous data handling.

Projects

Bro's Code  | **React.js · TypeScript · Node.js · Express.js · Socket.io · Tailwind CSS**

- It is an advanced collaborative code editor designed to facilitate seamless collaboration between developers. It enables multiple users to work together on the same codebase with live updates and instant synchronization. This platform operates through room-based sessions, allowing users to create or join specific rooms for different projects, where they can see the presence of other users and track their editing activity in real-time.

Gym Website  | **React.js · Node.js · Express.js · TypeScript · Tailwind CSS**

- Designed and developed a high-performance fitness website focused on sleek visuals and smooth user experience. Leveraged modern web technologies to build dynamic, scroll-based UI interactions that keep users engaged. Deployed the site using Vercel for lightning-fast load times and seamless scalability. Emphasized performance and accessibility to ensure strong online visibility.

Enterprise Resource Planning System | **React.js · Node.js · MongoDB · CSS**

- ERP system is an integral tool for modern businesses seeking to streamline operations, enhance efficiency, and improve decision-making processes. It integrate various business functions, including finance, human resources, supply chain management, manufacturing, and customer relationship management, into a centralized platform.

Achievements

SSIP Hackathon Finalist

Oct. 2022

- **State Level Finalist** of 'Azadi ka Amrit Mahotsav Hackathon - 2022' which is organized by " Student Start-up and Innovation Policy (SSIP) ".

Techmanjari - 2k23

Feb. 2023

- Participated in Techmanjari (Carnival of Science and Technology).
