

Manav Parmar

Software Developer

Aspiring to leverage my 3.5 years of professional Python experience, I am passionate about advancing my skills in Python and JavaScript to develop innovative solutions. With a strong enthusiasm for problem-solving and a commitment to delivering high-quality code, I aim to contribute effectively to dynamic projects and drive team success in a forward-thinking tech environment.

PROFESSIONAL EXPERIENCE

CitrusBug Technolabs

Jan 2022 - Dec 2023

Ahmedabad

- At CitrusBug Technolabs, I developed expertise in Django, API development, Python, payment gateways, DRF, Flask, third-party API integrations, SMTP mail integration, and JavaScript frameworks, contributing to various projects and delivering high-quality solutions.

SolGuruzLLP

Ahmedabad

Jan 2024 - Nov 2024

- With 1 Year at Solguruz, I gained expertise in OpenAI, FastAPI, RAG implementation using Langchain, and Twilio. I worked on AI products, managed interns, contributed to two external projects, and developed two internal projects. My focus included integrating Twilio for AI-powered calling and real-time chat applications with AI functionalities.

Leeway Softtech (Contract)

Ahmedabad

Jan 2025 - May 2025

- With 5 Month at Leeway Softtech, Worked on Beneelo, an eCommerce web application developed using Django. Contributed to core features including product CRUD operations, optimized REST APIs, and efficient data filtering to enhance performance and user experience.

Project

Dental AI Automation

- Specializing in a dental AI automation project, I collect patient insurance details and verify them with insurance companies via phone calls. I focus on integrating AI with Twilio for effective communication.

Time Tracking

- Crafted a PyQt5-based time tracking app akin to Hubstaff, seamlessly capturing screenshots and browser history for efficient client data transmission. Designed and developed both frontend and backend, ensuring a seamless user experience.

Indlyshorturl (TATA Product)

- Indlyshorturl is a TATA company product built to simplify long URLs into short, user-friendly links. Developed from scratch using React.js, FastAPI, and Django REST Framework, it features seamless URL shortening, website registration support, and SMS integration via the Jasmin SMS gateway for enhanced accessibility and robust link management.
