EDUCATION

Silver Oak University, Ahmedabad -

B.Tech(Computer Engineering) 2022 - 2025

(CGPA - 9.05/10)

Swami Sachchidanand Polytechnic ,Visnagar- Diploma

(Diploma In Computer Engineering) -2019 - 2022

(CGPA - 8.11/10)

Ascent school of science, palanpur — SSC

2017

TECHNICAL SKILLS

Languages: HTML, CSS, Java script,Bootstrap 5

Libraries: React js,Angular js,TS,Nodejs,Express js

Databases: Postgres,SQL

Other Technologies: Git/GitHub,Vs Studio(Using some Extensions)

Proficient: Data Structure and Algorithm

UI Component : Bootstrap ,MIUI

COLLEGE PROJECTS

Online Voting System — Minor Project

September 2021

Online Voting System Allow to Voters Cast to their Ballout Electronically From Any Location With Internet Access Online Voting System Provide Many Benifits Increased Accessibilty for Voters,faster and more More Accurate for Vote Counting And Reduce Cost Associated with traditional Paper Based System

This project works on Html,Css and Js also needs the Database like SQL and MS Excel

Amazon clone—

For learning HTML, CSS, Bootstrap,JAVASCRIPT “It is E-commerce website

LANGUAGES

●Gujarati- Native

●Hindi- Fluent

●English - learning to improve speaking for advanced conversations

PROJECT INTERNSHIP

BYNAMIC TECHNOLOGIES PVT .Ltd (4 Months)

Woked as a React.Js developer for an accounting software product where i built features like GST calculations,invoice generation and financial reports .Used React hooks and custom hooks to create effcient calculation logic.Developed reusable components for consistent UI across the application Implemented gloabal search functionality to quickly find data.worked with redux .optimized perfomance using techniques like memolization Gained good understanding of accounting concepts like GST and financial data processing this project

EXPERIENCE

Front End Developer at Arizona Automation & Technology pvt.ltd,Ahmedabad (Offline)(2 years)

Skilled FrontEND developer with 2+years of Experience building high-perfomance,reusable UI components and user-friendly interfaces for complex applications in React Js and Angular Js .proficient in Reactjs and Angular js and modern state management libraries like Zustand/Redux with a strong focus on optimizing renders using useMemo,memo and custom hooks.leveraged React Query,axios,ajax for api fetching and in react using Redux and userReducers for scalable state logic.Reactive Form for Angular and UseForm,formik for Reactjs for handling Dynamically form Enhanced UI consistency using Bootstrap and MIUI while ensuring maintainable code architecture.Expanding knowledge into backend developement with nodejs ,postgresSQL and sequelize(ORM) to contribute to full stack Solutions

CAREER OBJECTIVE

To work in a dynamic and growth-oriented organization where I can continuously learn new technologies, adapt quickly to industry advancements, and contribute meaningfully to the success of the company. I am committed to enhancing my skills—including learning new programming languages or tools as needed—and aim to become a valuable asset by delivering efficient solutions and driving innovation

HOBBIES

- Sketching
- Watching Movies
- Cricket

DECLARATION

I hereby declare that all the details furnished above are true to the best of my knowledge and belief.
