Professional Summary

Results-driven and detail-oriented React.js Frontend Developer with 2 years of experience in building dynamic, responsive, and scalable web applications. Proficient in React.js, Redux, JavaScript (ES6+), and integrating RESTful APIs. Strong background in component-based architecture, React Hooks, and Context API. Adept at writing clean, maintainable code and enhancing performance using modern frontend techniques like lazy loading, code splitting, and optimization tools. Passionate about creating intuitive, user-friendly interfaces.

Technical Skills

Frontend : React.js, Redux, React Hooks, Context API, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS

Backend & API Integration: RESTful APIs, JSON, API Consumption with Axios/Fetch

Database & Cloud: MySQL, MariaDB, PostgreSQL (basic), AWS (EC2, S3), ElasticSearch

Tools & Platforms: Git, GitHub, VS Code, Chrome DevTools, Postman, CI/CD

Others: Responsive Design, Component Reusability, Agile Methodologies, Linux OS

Professional Experience

Frontend Developer

Teople Technologies Pvt. Ltd - Pune, India

Sept 2023 - Present

- Built responsive UIs using React.js, Redux, and TypeScript.
- Created reusable components with React Hooks and Context API.
- Applied code splitting and lazy loading for performance improvement.
- Collaborated with backend teams (Java/Spring Boot) to define API requirements and improve integration points.
- Developed reusable custom components and maintained a **shared UI component library** to accelerate development cycles and ensure consistency
- Deployed apps on AWS using CI/CD pipelines via GitHub.

Projects

1. Yojak - NGO Management System

- Built dashboards and admin panels using React.js and Tailwind CSS.
- Implemented budget tracking, role-based access, and REST API integration.
- **Dashboard**: Comprehensive dashboard displaying NGO activities, budgets, and expenditures
- **Employee Management**: Manages employee records, roles, and responsibilities
- **Budget Tracking**: Monitors allocated and utilized budgets, displaying real-time financial insights

2. Order N Eat - QR-Based Hotel Food Ordering System

- Developed a real-time food ordering app with QR-based menus.
- Built order processing and admin dashboards using React and MariaDB.
- **QR-Based Ordering**: Customers scan a QR code to access the menu and place order.
- **Dynamic Menu Management**: Add, edit, or delete food items in real-time.
- **Order Processing**: Orders are directly sent to the kitchen and counter for real-time processing.
- **Kitchen & Counter View**: The kitchen receives live order prints while the counter tracks orders.
- **Tech Stack**: React.js, HTML, CSS, JavaScript, MariaDB

Achievements & Training

- Completed 6-month internship at Campus Infotech Pvt. Ltd focusing on React.js.
- Trained in ELK Stack (Elasticsearch, Logstash, Kibana) for monitoring and analytics.

Education

Bachelor of Engineering - Electronics and Telecommunication

Savitribai Phule Pune University, Pune, India

GPA: 8.1 | Graduated: June 2023

Relevant Courses: Data Structures, Operating Systems, Algorithms
