About Me

I am a very passionate and innovative Web developer who prepares all the time for work and loves to take new ideas to execution. Also, I can communicate effectively in a developer's language and translate them into technical solutions. Love to work with a diverse range of people and collaborative environment. I like to tackle challenges and can solve complex problems because together, everything is possible.

Work Experiences

- 23 Oct 2021 – Present – Full time

Front-end Web application developer

Evolvision Technologies (Provide customize solution for web and mobile app)

Ahmedabad, Gujarat.

Roles and Responsibilities

- Professional Experience in building layouts with HTML, CSS, SCSS and JavaScript from UI/UX design tools like Figma for mobile first and responsive web designing.
- Translate UI/UX designs into high-quality, responsive and user-friendly web pages using web frameworks such as React.JS, Next.JS, Bootstrap, Material UI and Tailwind.
- Strong Proficiency with JavaScript frameworks such as ReactJS and Next.JS.
- Implement RESTful APIs and GraphQL APIs for seamless communication between the front end and back end.
- Write clean, efficient, and reusable code that optimize performance and scalability.
- Stay updated with the latest trends and technologies in web development to improve technical skills.
- Debug and resolve issues reported by users and clients in Jira.
- Participate in code reviews to maintain code quality and improve team productivity.
- Good communication skills and a willingness to share ideas and feedback.
- Ability to work independently as well as collaboratively in a team environment.
- Contribution to open-source projects or personal portfolio work on GitHub.
- Work closely with the project management and QA teams to ensure smooth development cycles and timely deliveries.

Project Details

- Solution for Insurance companies automate insurance process. It's a web application to overcome the manual administrative work of Insurance sector. So now the team just monitors the process. It also showcases data by lots of different graphs and reports.
- Providing a digital platform to connect universities with visa agents or agencies around the world. Visa agencies can check all admission requirements including courses details and required documents by universities. So, universities can find the right students through application based on admission requirements.
- Organization HRMS workflow solution to save employee data, make announcements, manage employee leaves, manage tasks and keep track on company expenses or any other kind of approval processes

Regards

Nirav Gajjar
