PROFILE SUMMARY

- Full Stack Developer (Node.js, Angular, React) with 1.5+ years of experience in building scalable SaaS and E-commerce applications.
- Skilled in designing RESTful APIs, optimizing frontend performance, and integrating secure payment solutions.
- Strong team player focused on clean code, scalability, and practical problem-solving.

EXPERIENCE

Hyperlink Infosystem Pvt. Ltd. | Ahmedabad

Fullstack Developer

(July 2024 – Present)

- Developed and deployed multiple full-stack applications using MEAN stack (MongoDB, Express, Angular, Node.js) and React.js, optimizing performance and enhancing user experience.
- Led database design, API development, and frontend architecture, improving system scalability and reducing load times by 25%.

Internship At Hyperlink Infosystem

(Jan 2024 – June 2024)

- Learned and contributed to various tasks in full-stack development using Angular, Node.js, and SQL/NoSQL databases, along with third-party integrations.
- Gained hands-on experience in backend development, API integration, and version control with Git, while adhering to Agile methodologies, focusing on code quality, unit testing, and UI/UX standards.

SKILLS

- Frontend:** Angular, React.js, TypeScript, JavaScript, HTML, CSS
- Backend:** Node.js, Express.js
- Databases:** PostgreSQL, MySQL, MongoDB, Redis
- Tools:** Git, Firebase, Stripe, Socket.io, RESTful APIs, Agile Practices.
- Soft Skills:** Problem Solving, Code Optimization, Team Collaboration, Communication, Attention to Detail.

EDUCATION

- M.sc. In Information Technology**, GLS University, Ahmedabad | CGPA: 7.57 | (Jun 2022 – Jun 2024)
- PGD in Computer Applications**, Gujarat University, Ahmedabad | CGPA: 6.30 | (Jun 2021 – Jun 2022)
- B.com**, Gujarat University, Ahmedabad | CGPA: 6.40 | (Jun 2018 – Jun 2021)

PROJECTS

DBEBES - E-commerce App (English & Spanish Language) :

- Built Admin Panel with Angular and Node.js, using PostgreSQL for data management.
- Developed product browsing, subscription-based ordering (daily, weekly, custom), and automated reminders to enhance user experience.
- Enabled bulk product uploads via Excel for admins and integrated personalized banners and advertisements for targeted marketing.

Donation Platform (Stripe Integration) :

- Integrated Stripe Connect in Angular/Node.js for split payments between admin and campaigners, ensuring smooth user experience and secure transactions.
- Focused on clean, efficient code and a seamless donation flow for real-time transaction tracking.

E-commerce Research Selling Website:

- Built high-performance backend APIs with Node.js and MongoDB, utilizing Redis for caching to enhance response times and reduce database load.
- Focused on efficient indexing and query optimization to handle large volumes of research data, ensuring fast and scalable data retrieval.
