EXPERIENCE SUMMARY

Stroke Infotech (May 2022 – Present, Remote)

Designation : Sr. React JS Developer

- Working as a Senior React.js Developer, I lead the development of web and mobile applications using React.js, Next.js, and React Native. I build responsive user interfaces, handle API integrations, and optimize performance. I've contributed to client-facing platforms and internal tools, ensuring clean, maintainable code and seamless user experiences across devices.
- Developed and published a custom Shopify Remix (Hydrogen) app on the Shopify App Store, implementing dynamic storefront features, API integrations, and optimized performance using React.js and GraphQL.

DIT Interactive Pvt. Ltd. (January 2021– 2022, Remote)

Designation : Frontend Developer

- Converted PSD to Shopify websites.
 - Ensured each build functions correctly on Mobile, Tablet, and desktop devices.
 - Created custom sections and settings that are reused in the theme
 - Worked with cart API, Liquid objects, Variant swatches, cart drawer, and popup.
-

EDUCATION

Master of Computer Application

2019 – 2021

GLS (Gujarat Law Society) University, Gujarat

Result : 7.42 (CGPA)

Bachelors's in Computer Application

2016 – 2019

Bhakta Kavi Narsinh Mehta University, Gujarat

Result : 78.08%

PROJECTS

HRM – Human Resource Management

React.js | Material UI | REST API

- Built a Human Resource Management (HRM) web app using React.js and Material UI to manage employee records and streamline payroll. Implemented CRUD operations for employee data, allowing admins to add, edit, view, and delete employee profiles. Developed a feature to generate and email employee salary slips, reducing manual effort.
- The system includes role-based access control, responsive UI, and an intuitive dashboard for easy data handling. Focused on building reusable components and maintaining clean, scalable code to ensure long-term maintainability and performance.

Safety Response App

React Native | Firebase | Scorchsoft | REST API

- Developed a cross-platform mobile app using React Native for emergency response and incident reporting. Integrated Firebase for real-time data handling, secure authentication, and cloud storage.
- Used Scorchsoft to ensure smooth performance and fast screen transitions. I focused on creating a clean, intuitive UI/UX, along with managing REST API calls for dynamic data interaction. The app is optimized for quick access and reliable functionality on both iOS and Android devices.

Digital Sales Man – Shopify App

Shopify Remix (Hydrogen) | React.js | GraphQL | App Embed | Subscriptions

- Developed and published Digital Sales Man, a Shopify Remix app designed to boost merchant sales through automated advertising strategies. The app scans all store products, generates targeted ads, and displays them across high-quality websites on the open web—acting as a digital sales agent.
- Implemented app embed functionality for seamless integration and subscription billing for monetization. Focused on building a responsive UI, efficient API communication, and smooth user onboarding. Designed to require zero coding, the app helps merchants enhance visibility, increase conversions, and build long-term customer connections effortlessly.

Instagram Feed – Grid & Slider

Shopify Remix | React.js | App Embed | Admin Settings

- Built and published a Shopify Remix app that displays an Instagram feed in customizable grid or slider layouts, fully adaptable to match any store theme. The app allows merchants to connect with customers by showcasing live Instagram content, enhancing brand engagement and visibility.
- Developed an intuitive admin panel for layout control, post settings, and feed customization. Implemented app embed blocks to render the gallery on the storefront easily. Designed for mobile responsiveness and zero-code setup, enabling quick installation and seamless integration with Shopify stores.
