PROJECTS

JOJO Subscription Panel – SVOD/TVOD Integration

- Built a secure subscription management FrontEnd for JOJO App supporting SVOD and TVOD. This system allows users to purchase flexible plans and stream content based on their subscription.
- Implemented product management and real-time status updates across all roles.
- Implement sorting Searching and pagination functionality

JOJO CMS – Dynamic Content Management System

- Developed a custom Content Management System (CMS) to manage dynamic content for the JOJO OTT platform.
- This CMS enables the JOJO team to upload, update, and organize movies, web series, banners, genres, and categories efficiently.
- Role-based admin access and secure login system.
- Add/edit/delete dynamic content (titles, thumbnails, trailers, metadata).

JOJO WebOS – Smart TV App for OTT Streaming

- Created a Smart TV application (WebOS) for JOJO, inspired by platforms like Netflix and Hotstar, enabling users to stream content on large screens with a user-friendly interface.
- Responsive UI for Smart TVs with remote control navigation.
- Integrated video player with adaptive streaming (HLS/DASH).

Fin-Visor

- This project is related to a Banking Transaction System and includes different user roles, such as User and Admin.
- The system features various modules, including: Dashboard, Analytical Dashboard, Admin Dashboard, Activity Logs, User Settings System, Settings, Categories, Account Page Transactions, Transaction Processing, Transaction Review Page, User Management Modules And much more.

Fin Aasset wallet

- This project related to Crypto currency
- In this project my work related to make Different pages like Menubar, login, logout, sidebar, Charts etc
- In this project making admin and user panel and divide module for admin and users
