EDUCATION

Veer Surendra Sai University of Technology

Degree in Master of Computer Application

CGPA: 7.16

Burla, Odisha

2020 - 2022

College of Business Administration

Degree in Bachelor of Computer Application

Percentage: 72.45%

Berhampur, Odisha

2016 - 2020

EXPERIENCE

Hybrowlabs Technologies Pvt Ltd. | Software Developer

Pune | Jan-2025 - April-2025

- Built a dynamic sports web application using ReactJS, featuring live scores, team/player statistics, personalized match schedules, and real-time web push notifications to boost user engagement.
- Integrated RESTful APIs for delivering video highlights, sports news, and fantasy league features, enhancing interactivity and content depth.
- Designed a responsive, high-performance UI with dark mode support, smooth navigation, and optimized rendering using React Router, lazy loading, and Redux for efficient state management.

Nexus Technoware Solutions Pvt Ltd | Software Developer Intern

Apr-2024 - Oct-2024

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js (MERN), delivering scalable and responsive solutions and contributing to key features in Employee Management System.
- Built and integrated RESTful APIs to manage complex CRUD operations. Implemented secure authentication and authorization systems using JWT, improving user data protection and access control.
- Debugged and improved front-end and back-end components, reducing API response times and enhancing overall user experience.

SKILLS

Programming Languages: Python, HTML, CSS, JavaScript
Libraries/Frameworks: ReactJS, NodeJS, ExpressJS, React Native
Tools / Platforms: VS Code, Postman
Databases: MongoDB

PROJECTS / OPEN-SOURCE

Chat Application | [Link](#)

MongoDB, Express.js, React.js, Node.js, Socket.io

- Developed a full-stack real-time chat application using the MERN stack with Socket.io for live messaging.
- Implemented user authentication, including sign-up and login features, ensuring secure communication using JWT (JSON Web Tokens).
- Built a responsive user interface using React.js and handled RESTful API requests with Express.js and Node.js.
- Enabled real-time updates for active chat sessions, online status, and notifications.

GMail Clone | [Link](#)

React.js, Firebase, Tailwind css

- Developed a functional Gmail clone with features such as user authentication, email composing, inbox management, and real-time data synchronization.
- Utilized Firebase for backend services, including authentication and database storage, and efficient state management across the app.
