PROJECTS

Food Ordering Application

Developed a Food Ordering Application using React.js, integrating Swiggy's live API for real-time functionality. The application features restaurant search, top-rated filtering, menu browsing, and a cart system for seamless user experience. It enables users to select menu items, add them to the cart, and view the cart for a smooth ordering process.

DevTinder Application

This MERN stack application allows users to sign up, create and update profiles, and send/receive connection requests. Upon mutual acceptance, users are matched and can interact, with data stored in MongoDB.
