WORK EXPERIENCE

Techflitter Solutions Private Limited

JAN 2023 - MAY 2025

QA Engineer

- Successfully managed and executed the testing project with the team, ensuring smooth transitions to production.
- Develop detailed test plans and strategies based on project requirements.
- Perform manual testing as per the project's needs.
- Worked on testing both mobile applications and websites.
- Identify, log, and track defects using defect management tools (e.g., JIRA, Testlink).
- Performed Basic API testing using Swagger.
- Work closely with cross-functional teams, including developers, business analysts, and product owners.
- Participating in sprint planning, daily stand-ups, and retrospective meetings as part of the Agile software development methodology.

PROJECT SUMMARY

Joyride (Shared micro mobility)

- It is the shared use of a vehicle, bicycle, or scooter. It is an innovative transportation strategy that grants users short-term access to transportation on a need basis.
- I handled this project as a QA from the development phase of testing to the final end-to-end testing.
- Technology Used - Manual Testing, Jira, API Testing, Swagger, and Excel for Test cases.
