SKILLS

- React JS
- Node JS , Express JS
- Mongo Db, MySQL
- Sequelize(ORM),
- Firestore database
- HTML, JS, CSS
- Bootstrap , Tailwind CSS
- AntDesign
- Material UI
- Git , Bitbucket

PROFILE

I specialize in frontend development with React.js, focusing on state management and component-based architecture. On the backend, I'm skilled in Node.js, Express.js, and designing RESTful APIs, while also working with MongoDB, Sequelize, and Firestore for efficient data management. I integrate frontend and backend components seamlessly, optimize data fetching with GraphQL, and build intuitive UIs using frameworks like Material UI, Ant Design, Bootstrap, and Tailwind CSS.

EXPERIENCE (2 YEAR+)

MERN Stack Developer - Intern(6 Month) | IT Path Solutions

(Jan 2023 - July 2023)

- Contributed to front-end development by utilizing React, including assisting in the transition of a WPF application to React.js to improve performance and user experience.
- Developed Spring Boot APIs for an exam module system, enhancing backend development skills and working with SQL databases to ensure efficient data management and retrieval.

MERN Stack Developer - (1.5 Year +) | IT Path Solutions

(July 2023 - Present)

- Contributed to front-end development by utilizing React, including assisting in the transition of a WPF application to React.js to improve performance and user experience.
- Developed Spring Boot APIs for an exam module system, enhancing backend development skills and working with SQL databases to ensure efficient data management and retrieval.

PROJECT

Devo (E-commerce Website)

3 Months

- Vericy is an AI-driven platform that helps users assess the privacy policies of companies and brands to identify any potential risks to user privacy.
- It prioritizes consumer protection by offering insights into whether a company compromises privacy. The platform is designed with a strong focus on privacy and transparency.

Vericy (Privacy Analyzer)

2 Months

- Vericy is an AI-driven platform that helps users assess the privacy policies of companies and brands to identify any potential risks to user privacy.
- It prioritizes consumer protection by offering insights into whether a company compromises privacy.
- The platform is designed with a strong focus on privacy and transparency.

Digital Repository

4 Months

- The Ship Management System is a robust software solution aimed at enhancing the management and operation of ships.
- It allows users to input various types of information, such as text, images, documents, and ongoing lists, and generates detailed reports for efficient ship management.

IRNAVGATH (IRCLASS)

1 Year 2 Months

- ORS is a desktop application designed for ship survey management. It allows users to verify and review detailed information about a ship. The app helps in conducting thorough surveys of the ship's condition and compliance.
- It provides a streamlined process for managing and documenting survey results.

EDUCATION

Diploma in IT Engineering | Sir B.P.T.I, Bhavnagar

- Diploma in Information Technology from Gujarat Technological University (GTU)
- Year : 2017 To 2020
- CGPI : 9.02

BE in IT Engineering | Shantilal shah engineering collage, Bhavnagar

- Diploma in Information Technology from Gujarat Technological University (GTU)
- Year : 2020 To 2023
- CGPI : 9.06
