7.4 CGPA

Government polytechnic Ahmedabad

2014

Diploma in Electrical engineering

6.6 CGPA

Experience

Amin Softtech

7/11/2022 - Present

React js developer

Projects

Soulid Web

Soulid Web is a dating and social event platform that allows users to create and join in-person events based on their dating preferences (e.g., LGBTQ+, heterosexual men/women). The application promotes inclusive social interaction through personalized events, secure user engagement, and real-time communication.

Wellness Bezorgd

A booking-based web platform that enables users to search for services based on their needs, preferred durations, and service categories, select time slots, enter a service address (for home visits), and make payments via Stripe. The app ensures real-time slot management and provides a smooth and intuitive user experience.

Hue the app

Developed a React.js web app that retrieves music URLs from the Spotify API. The app also supports multilingual lyrics, allowing users to view lyrics in different languages, and includes audio components to play the music.

Nezzie web

Developed a React.js web app with dual user flows for users and advocates. It includes comprehensive authentication features, booking functionality, and facilitates interactions between users and advocates.

Separate flows for users and advocates with login, registration, password reset, and social login via Google.

Users can book advocates according to their needs and preferences. Advocates can accept or reject booking requests.

Payment integration using Stripe

Schedule meetings through Twilio audio calls.

Declaration

I hereby declare that the above mentioned information is true and correct per my best knowledge and I bear the responsibility for the correctness of the above mentioned particulars.
