PROFESSIONAL SUMMARY

Skilled Full Stack Developer with 3.6 years of experience building scalable web applications using Node.js, React.js, and Next.js. Proficient in REST API development, microservices, and delivering performance-driven solutions in Agile environments.

SKILLS

Languages: JavaScript, TypeScript, PHP

Frameworks: Node.js, React.js, Next.js, Express.js, NestJS, CodeIgniter

Frontend: HTML5, CSS3, SCSS, Bootstrap, Tailwind, jQuery, Ajax, JSON, Redux, MUI

Backend: REST APIs, GraphQL, JWT, OAuth

Databases: MySQL, MongoDB

Tools: Git, GitLab, GitHub, VS Code, Chrome DevTools, ReduxTool

DevOps: Docker, GitHub Actions, GitLab CI

Others: Agile, SCRUM, UI/UX consultancy

PROFESSIONAL EXPERIENCE

Started my career with 6 months of training and have 3 years of professional experience working as a Full Stack Developer at **Hidden Brains Infotech Pvt. Ltd**, focused on building and maintaining enterprise-level applications using React.js and Node.js.

- Requirement Analysis & Development: Proficient in gathering and analyzing requirements and translating them into actionable development tasks.
- Developed and maintained scalable back-end services and APIs using Node.js, Express, NestJS, and PHP (CodeIgniter).
- Solution Designing: Experience in designing robust solutions tailored to specific project needs.
- Test-driven Development: Ensured code reliability and quality using test-driven methodologies.
- Agile Environment: Worked in Agile environments with cross-functional teams.

- Design Patterns: Proficient with Middleware, Template Method, Event-Driven Architecture, Dependency Injection, and Microservices.
- CI/CD & Docker Integration: Implemented CI/CD pipelines using GitHub Actions and GitLab CI, containerized applications with Docker.
- API Security & Database: Implemented OAuth and JWT for API security, used MySQL and MongoDB extensively.

PROJECTS

Mobility Budget Management System

Tech Stack: React 18, Redux Toolkit, RTK Query, Node.js (LTS), Express.js, MySQL, Material UI, PM2, Microservices, RabbitMQ, AWS S3

Description: A system for employees to manage mobility expenses with real-time admin oversight and approval workflows.

- Developed frontend in React 18 with Redux Toolkit and RTK Query.
- Built scalable backend using Node.js and Express.js.
- Integrated microservices with RabbitMQ.
- Managed file uploads with AWS S3 and process monitoring with PM2.

Touristopia – Event Management System

Tech Stack: React 18, Node.js (LTS), MySQL, Redux, Hooks

Description: An interactive platform to discover, book, and manage events.

- Designed full architecture and integrated secure JWT-based login.
- Created features for event creation, booking, and scheduling.
- Enhanced user experience through React Hooks and modular UI.

Social5G

Tech Stack: Next.js (latest), TypeScript, Redux, Node.js, MongoDB, Twilio

Description: A real-time chat platform enabling seamless interaction between influencers and brands.

- Developed role-based access control and optimized chat experience.
- Integrated Twilio for real-time messaging.
- Handled backend scalability using Node.js and MongoDB.

Fly Five – Learning Management System

Tech Stack: PHP (CodeIgniter), JavaScript, jQuery, Bootstrap

Description: A web-based LMS focused on Social Emotional Learning (SEL).

- Designed responsive UI and CSS templates.
- Developed backend modules using CodeIgniter.
- Implemented user management and reporting modules.

EDUCATION

Master of Computer Applications (MCA), Technocrats Institute of Technology (Excellence), Bhopal (2020 – 2022) | CGPA: 8.54/10

Bachelor of Computer Applications (BCA), Sant Hirdaram Girls College, Bhopal (2017 – 2020) | Percentage: 67.33%

ADDITIONAL INFO

Open to relocation | Can join in short time | Valid passport available
