TEST ENGINEER

Cognizant Technology Solutions

-Project Name: The Home Depot Mar 2024 - Present.

-The Home Depot is a web-based e-commerce site where a variety of products are available. There are various stores located all around the United States of America. The customers are provided with many options to buy the products. Products can be bought online and shipped to the house, or they can be bought online and picked up in store, or the product's availability in stores can be viewed online, or the products can be bought online and shipped to a store. The project objective is to ensure that all these options are delivered to the customers properly.

SOFTWARE TESTER

Maersk Global Service Centre

-Project Name: Anchor RBAC Dec 2022 - Mar 2024.

-Role-Based Access Control (RBAC) is the modern role-based permissions management model that helps manage access at both a broad and a granular level, by aligning the assigned permissions role(s) with the organizational role of the user. It helps in avoiding access leaks and, therefore, reduces the risk of data and information security breaches. When we talk about the RBAC, a role is a collection of permissions based on different job functions across an organization. We mentioned earlier that RBAC is an approach, which means that it is designed to complement other existing security policies to strengthen the security landscape of the enterprise. In essence, RBAC provides a way to group different types of permissions across the enterprise and categorize them to effectively assign those permissions based on the job function of the user.

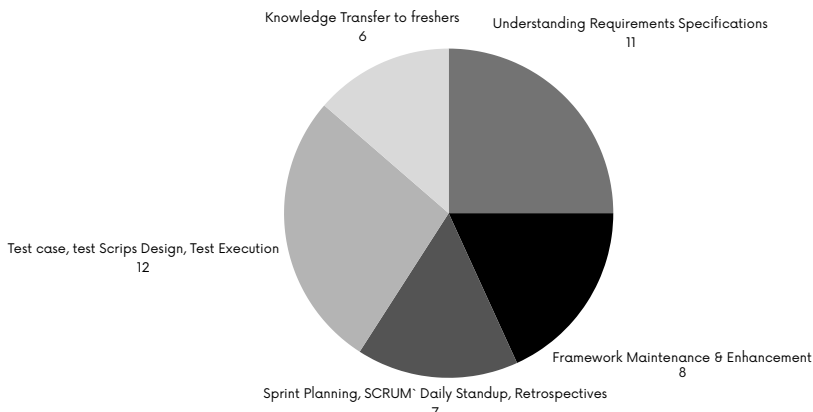

ASSOCIATE

Canary Insights

-Project Name: Canary Insights Aug 2021 - Nov 2022.

-The client provides employee activity monitoring and behaviour analytics software. The scope of the project was to monitor the activities of the employees. The activities include details about the employee attendance, in and out timings, and website browser history. This can be done both in the form of images and informal data. This application is based on client-server communication.
