SUMMARY

Detail-oriented QA Engineer with 4 years of experience in both manual and automated testing across various software applications. Proven track record in developing and executing comprehensive test plans and test cases, identifying bugs, and ensuring quality in agile development environments. Proficient in utilizing tools such as Selenium, JIRA, and Jenkins for continuous integration and automated testing. Strong problem-solving skills with the ability to work collaboratively with cross-functional teams to deliver robust and high-quality software solutions.

PROFESIONAL & PERSONAL SKILLS

- Database – Oracle
- Languages - Java and SQL
- API Testing - POSTMAN, SOAP UI
- Testing tools- JIRA, Azure DevOps, Selenium WebDriver
- Functional, Non-Functional, UAT, Regression, SDLC, STLC, Defect life cycle.
- POM, TESTNG
- Manual Test Case preparation and Test Implementation.
- Agile Methodology

EDUCATIONAL PROFILE

Bachelors Of
Engineering from Swami
Ramanand
Teerth Marathwada
University Nanded

WORK HISTORY

- Organization –Melstar Information Technologies
- Designation – Software Test Engineer
- Duration - July 2021 to Till Date
- Location - Mumbai

PROFESSIONAL SUMMARY

Proficient in identifying and resolving issues throughout the testing lifecycle, ensuring highquality deliverables and timely bug resolution.

Experienced in conducting comprehensive **API testing**.

Demonstrated leadership in managing testing teams and collaborating effectively with stakeholders to drive project success.

Proven ability to communicate testing processes, issues, and recommendations clearly and effectively. Skilled in performance testing to evaluate system responsiveness and scalability.

Adheres to best practices in test planning, execution, and reporting to ensure efficient project milestones. Actively pursues process improvement and innovation to streamline testing processes and enhance overall quality.

Proficient in **manual testing** methodologies, **API testing**, and **database** validation. Skilled in crafting robust test cases and generating comprehensive test reports.

Experienced in **Selenium automation** with Java, Selenium WebDriver, and TestNG, adept at scripting and executing test suites for web applications.

Demonstrated proficiency in test case design and execution across **SDLC** and **STLC** phases.

Domain expertise in E-commerce and Insurance, with a deep understanding of industry-specific testing challenges.

Hands-on experience with Selenium tools like Selenium IDE, RC, and Web Driver for efficient automation. Proficient in SQL for data integrity and validation. Strong in test planning, strategy development, estimation, scheduling, and execution.

Well-versed in bug tracking with tools like **Jira** and **ADO**. Knowledgeable in **Agile methodologies** and iterative development. Skilled in team management and cross-functional collaboration.

Effective communicator with strong analytical and problem-solving skills.

Proficient in various testing types including Smoke, GUI, Functional, Integration, Regression, UAT

- Testing and Performance Testing.

Experienced in designing detailed test cases, decision tables, and traceability matrices.

- Skilled in preparing and executing automation scripts using Selenium WebDriver, TestNG, and the Page Object Model (POM) framework for optimizing regression testing and accelerating release cycles.

- ## PROJECTS

- Project Title: The Geographic Expansion

- Domain: Insurance

- *Roles and Responsibilities:*

- The responsibilities include conducting a thorough analysis of requirements and collaborating closely with the BA team to ensure a comprehensive understanding of project needs.

- This involves developing detailed test cases using Black Box Testing within JIRA 12 and performing Manual Testing, with a focus on Functional, Regression, and Re-Testing aspects. Defining End-to-End Test Scenarios, Test Cases, and Test Data is essential.

- In addition, creating and maintaining transition documentation for knowledge sharing among team members is a key part of the role.

- Contributing to test automation using Selenium WebDriver, Java, TestNG, and the Page Object Model (POM) framework is critical. This includes writing and maintaining automated test scripts, ensuring their integration into the testing framework, and keeping them up to date with the latest application changes.

Active participation in daily scrum meetings is required to discuss progress, address impediments, and ensure alignment with the development team.

Regular involvement in script migration and the development of new scripts using Selenium, Java, and TestNG is also necessary.

Ensuring timely testing of deliverables, identifying and reporting defects using JIRA, and tracking their resolution are key tasks.

This includes validating log files and data through UNIX and SQL queries to ensure data integrity and application functionality.

Continuous communication with clients through status calls is essential to provide updates, address concerns, and ensure client satisfaction.

Overall worked on manual and automated testing skills, proficiency in Selenium with Java, TestNG, and POM, and strong collaboration and communication abilities to effectively support the project's testing and quality assurance needs.
