Professional Summary

- 3+years of experience in Software Testing (Manual, Automation testing).
- Having experience on Automation Tools like **Selenium, Appium**.
- Having good experience in testing **API** using **Postman**
- Experience in Framework using **TestNG**
- Experience in running the automation on CI/CD pipeline using **Jenkins and GitHub Actions**
- Experience in developing Test Cases based on Requirements.
- Experience in tools like **JIRA, Bugzilla, or TestRail** for managing and tracking defects
- Performed **Sanity Testing, Functional Testing & Regression Testing, Smoke Testing, API Testing, Functional and Non-Functional Testing**
- Good knowledge on Object Oriented Programming concepts and Java Programming.
- Ability to learn and adapt to new tools and technologies very quickly.
- Ability to communicate effectively in verbal and written English
- Excellent Communication and interpersonal skills with clear understanding of business processes and ability to work as part of a team or individually.
- In-depth knowledge of Software Development Life Cycle (SDLC) and Software Testing Lifecycle (STLC).

Work Experience

- Worked as Software Test Engineer at **Panorama Software Solutions** at April 2022

Technical Expertise

- **Programming Languages** : Java
- **Automation Tools:** Selenium WebDriver, Appium
- **Defect Tracking Tools** : **JIRA, Azure Devops**
- **Frameworks** : TestNG, Hybrid and Page Object, Keyword and Data Driven Framework
- **Development Tools** : **Eclipse** , Microsoft Visual Studio
- **Build Tools:** Maven, GIT, Jenkins.
- **Cross Platform Tool** : Browser stack, Android studio , Xcode
- **API Testing:** Postman
- **Domains:** Transportation services, financial services

PROJECT SUMMARY:

Project #1: Avis Budget Car rental

Project	: Transportation services
Software/Tools	: Java, TestNG, Selenium, Git, Appium, Android Studio,Xcode
Testing Type	: Manual & Automation
Duration	: October 2022 - Till now

Project Description:

Worked on the automation of the Avis Budget car reservation mobile application, focusing on enhancing quality and efficiency across four regions: the United States, Canada, New Zealand, and Australia. The project involved automating three key user flows: Sign In, Sign Up, and Guest Booking. The automation covered reservation scenarios for both signed-in users and guest users, including creating, modifying, and canceling reservations to ensure full end-to-end functionality.

Roles and Responsibilities:

- Worked on Agile methodology and maintained all the Test case on Jira
- Integrate the framework with CI/CD with **Jenkins**
- Perform manual testing on different environments
- Bitbucket used for managing the code repo and deployment
- Automate Mobile application using **Selenium**
- Testing the software developed to meet the requirements of the end user.
- Used Zephyr for Test Case management and maintaining the suites
- Involvement in the preparation of Test Scenarios, Test Cases and data.
- Involvement in the test execution result Analyzing and defect reporting.

Project #2: Raindrop

Project	: Investment management and Financial service
Software/Tools	: API, Postman
Testing type	: Manual
Duration	: April 2022- October 2022

Project Description:

Raindrop is an investment management and financial services application that provides users with personalized investment solutions and financial planning tools. The project involved manual testing of both the UI and APIs to ensure functionality, reliability, and a seamless user experience across platforms.

Roles and Responsibilities:

- Testing the application with Regression
- Experience in the preparation of Test Plan, Test Scenarios, Test Cases and data.
- Involvement in the test execution result Analyzing and defect reporting.
- Used Jira for Test Case management and maintaining the suites
- Bitbucket used for managing the code repo and deployment
- Testing of UI and API
