+91-9642772851 | Hyderabad

sheikjafar.sj@gmail.com | <https://www.linkedin.com/in/shaik-jafar-356a81234>

OBJECTIVE

Motivated QA Engineer with 3 years of experience including 1 year in Playwright automation—proficient in scripting and executing automated tests—and 2 years in manual and API testing using Postman. Skilled in designing detailed test cases, identifying and documenting defects, and performing end-to-end testing to ensure software quality and reliability.

EDUCATION

Bachelor of Technology in the stream of Electrical and Electronics Engineering
Aurora Scientific and technology research academy, 2016 – 2019 percentage: 60%.

SKILLS

- **Automation Testing:** Playwright – proficient in scripting automated tests by using the pom architecture, parallel test execution, video recording, and Playwright Test Runner
- **Manual Testing & API Testing:** Postman, Swagger – creating and executing test cases, validating APIs
- **Testing Types:** Regression, Integration, Sanity, Smoke, System Testing, UAT, Usability, Performance (manual), Ad-hoc, Compatibility, Exploratory Testing
- **Bug Tracking & Reporting:** GitLab, JIRA
- **Test Case Management:** Mustard
- **Programming Languages:** Basic knowledge of JavaScript
- **Methodologies:** Agile, kanban
- **Test Documentation:** Writing test plans, detailed test cases, and defect reports

EXPERIENCE

Software test Engineer | [Orasi global services]

From [June 2022] – Present:

- Developed and maintained Playwright automation suite using POM architecture.
- Integrated test recording, trace viewing, and rich reporting for enhanced debugging efficiency.
- Validated REST APIs with Postman using custom assertions for robust testing.
- Designed and executed manual test cases for the Orasilabs web platform and tracked defects using GitLab.
- Conducted functional, regression, and integration testing across multiple platforms.
- Actively participated in Scrum meetings (sprint planning, daily stand-ups, retrospectives), contributing to process improvements and quality enhancements.

PROJECTS

Project#1: Orasi labs

- Spearheaded testing activities for Orasi labs' virtual machine environments, specializing in both manual and functional testing to ensure robust application performance.
- Executed in-depth API testing using Postman and Swagger, validating backend services for seamless integration and optimal functionality.
- Tracked and reported critical defects, working collaboratively with development teams to ensure quick identification and resolution of issues.

Project#2: Alchemy gridworks

- Led UI workflow automation using Playwright and no-code tools.
- Generated detailed test reports and performance metrics, offering actionable insights to stakeholders and fostering continuous enhancements in the testing process.
