## Professional Experience

### QA Software Engineer

**Urban Company, Gurugram, Haryana, India | July 2023 – Present**

[Payroll Company -Vintage Software Development Pvt LTD]

- Participated in all phases of the testing lifecycle, including test planning, test case design, execution, and maintenance; contributed to a 20% increase in test automation coverage.
- Automated functional test scenarios using **Selenium WebDriver**, **Java**, and **TestNG**, enhancing test reliability and reducing manual effort.
- Engineered and maintained a robust automation framework using **Selenium-Java** with **TestNG** and **Maven**, enabling early defect detection during STLC.
- Designed and implemented the **Page Object Model (POM)** to streamline test script maintenance and improve code reusability.
- Executed multiple testing types such as **Functional**, **Smoke**, and **Regression** to ensure software quality across builds.
- Logged, tracked, and validated defects using **Jira**, ensuring timely resolution and smoother production deployments.
- Authored and executed detailed manual test cases, and collaborated with developers to verify and close defects.
- Conducted smoke tests post-deployment to validate production readiness during each release cycle.
- Actively contributed to daily stand-up meetings and weekly team syncs, providing updates on test progress and blockers.

## Project

### OnDemand Home Services Web Application

Feb 2023 – Mar 2025

#### Project Overview

Urban Company is a leading on-demand services platform offering solutions in beauty, cleaning, and appliance repair. The web application enables customers to discover, schedule, and pay for services online. This project focused on delivering a scalable, real-time, and user-friendly platform with seamless booking, partner assignment, and integrated payments.
