TECH MAHINDRA

Associate Test Engineer

Experienced Software Test Engineer with 2 years in manual testing, well-versed in SDLC, STLC and different testing techniques. Seeking a challenging role to contribute expertise in ensuring high-quality software through strategic planning and meticulous execution, Committed to continues improvement and fostering collaboration for overall team success

Professional Summary

- Adept at identifying, documenting and tracking software defects using industry-standard bug tracking systems
- Expert in the localization Testing
- Good understanding of Agile practices, driving efficient collaboration with cross-functional teams for enhanced project delivery
- Committed to ensuring the delivery of top-tier software products through meticulous testing and in-depth analysis
- Proactive in staying abreast of the latest industry trends and best practices in software testing Exhibits excellent attention to detail, analytical skills and problem-solving abilities
- Dedicated to continues improvement, enhancing software testing practices for optimal efficiency and effectiveness
- Strong communication skills facilitate effective collaboration and reporting of test results and recommendations
- Proficient in designing and executing comprehensive Test Plans, Test cases and Test scripts

Skills

- VR Testing
- Localization Testing
- Mobile and Web Application Testing
- Basics of API Testing
- Test metrics and Test Validation
- Black Box Testing Techniques
- Regression Testing
- Exploratory Testing
- Functional Testing
- Browser Compatibility Testing
- Accessibility Testing

Projects

I18N, Journey, System UX, Avatar, Social Media Application, Browser

- Led comprehensive Manual Testing in VR and Mobile Application for Localization, ensuring functionality and optimal user experience
- Managed Testing for Social Media and Web Applications, ensuring interactions, data integrity and feature functionality validation
- Collaborated cross-functionally for defect identification and continuous improvements across application domains
- Evaluate new features to ensure stability and meet expected requirements
- Executed regular smoke/ regression testing plans for sustained stability and reliability
- Created weekly/monthly bug reports for on-site teams, guiding testing process improvements and strategic enhancements
- Trained junior team members, imparting project insights and best practices for enhanced proficiency in testing

Tools

- TestRail
- MTT
- Postman
- ADB
- Jira
- Meta Tools

Appreciations

- Awarded the Bravo Award for the Quality Focus
- Appreciation from the on-site teams for the outstanding performance

Education

2019-2022	Prof Ram Meghe College of Engineering and Management Badnera Amravati Bachelors of Engineering - Computer Science and Engineering
2017-2019	Govt. Residential Women's Polytechnic Yavatmal Diploma- Computer Engineering
