QUALITY ASSURANCE ENGINEER

✉ Priyanksony2000@gmail.com ☎ 7383738634 📍 Ahmedabad

CAREER OBJECTIVE

Detail-oriented and skilled Quality Assurance Engineer with 3 years of experience in software testing, team collaboration, and product quality assurance. Proficient in both manual and automation testing with a strong command of industry tools and methodologies. Looking to leverage my skills in a challenging QA role to contribute to high-quality software delivery.

WORK EXPERIENCE

08/2022 – Present
ahmedabad

AccelerateBS India Limited **Postion Quality Assurance Engineer**

Project: Medical Site

Involved in testing a healthcare web application that handles patient records, appointment bookings, prescriptions, and diagnostics. Worked as a manual and automation tester to validate key functionalities and ensure data accuracy, privacy, and responsiveness across platforms.

Project: E-commerce Site:

Overview: Working as a manual tester for an e-commerce platform, performing cross-browser testing and validating site behavior across multiple devices and browsers.

Project: Time Tracking System

Overview: Working as a QA tester focusing on both manual and automation testing. The system monitors employee work hours, manages attendance logs, and ensures accurate reporting through rigorous test execution and defect tracking across platforms

Roles and Responsibility:

- **Responsibilities:**
- Reviewed project documents to define testing requirements.
- Developed test scenarios, test cases, and automation scripts.
- Executed tests, reported defects, and prioritized their severity.
- Performed regression testing for code changes.
- Managed the defect lifecycle.
- Automated deployment processes to improve efficiency.
- Achieved 30% test case automation.

EDUCATION

2020 – 2022

MCA - Master of Computer Applications
Gujarat Technological University
CPI: 8.71

2018 – 2020

BCA - Bachelor of Computer Applications
Gujarat University
CGPA: 6.19

KEY SKILLS

- Functional Testing
- Automation Testing with Selenium, Test NJ.
- Database Testing
- Design testing
- Core Java
- Security Testing
- Regression Testing
- API Testing using Postman
- Bug Tracking and Management with Jira

★ CORE COMPETENCIES:

Testing Types:

- Functional Testing, Regression Testing, Cross-Browser Testing, API Testing (Postman), Databas testing, Accessibility Testing

Manual Testing Tools:

- Cross-browser tools, Lighthouse, Accessibility testing tools, Zenu

Automation:

- Selenium WebDriver, TestNG

Programming:

- Java

Tools & Technologies:

- Eclipse, Jira, Maven

Framework Design:

- Page Object Model (POM)

★ CAREER ABSTRACT

- 3 years of experience in manual and automation testing.
- Good at understanding requirements and writing clear, effective test cases.
- Experienced in end-to-end delivery and production deployments.
- Well-versed in SDLC and STLC processes.
- Hands-on experience with Selenium for UI automation.
- Confident using XPath to find web elements.
- Built automation frameworks using Maven, TestNG, and POM.
- Strong in API testing using Postman.

COURSES

1/10/2024 – Present
Ahmedabad

Advanced Automation Testing Course - STAD Solution

Completed a hands-on training program covering advanced concepts in automation testing

- Selenium WebDriver (handling elements, synchronization, browser actions)
TestNG framework (annotations, assertions, parallel execution) Maven (build automation, dependency management) POM (Page Object Model design pattern)
Integration with tools like Jenkins and Git Real-time project-based testing
Reporting using Extent Reports and TestNG reports

DECLARATION

I confirm that the details provided above are correct and complete to the best of my knowledge.
