PHP, WordPress, WooCommerce Developer

Perfection Infoweb Pvt Ltd

May 2018 – April 2021 Ahmedabad, India

- Built custom WordPress plugins and WooCommerce extensions.
- Worked on multi-language and SEO-optimized websites.

Jr. Software Developer

Xongolab Technologies

Mar 2017 – Feb 2018 Ahmedabad, India

- Assisted in PHP and CodeIgniter-based web development.
- Contributed to bug fixes and small-scale enhancements.

KEY PROJECTS

Diamond Ring Builder (Magento 2 + Hyvä Theme)

A custom-built 3-step ring builder allowing users to select diamonds and settings, with full frontend filters and session-based product customization.

Medisole International (Magento 2 + Luma)

Developed a Magento 2 project using the Luma theme with customizations, including theme enhancements and multiple custom modules to implement additional business features and functionality.

Fabrikat (Magento 2 + Luma)

Developed a Magento 2 project using the Luma theme with customizations, including theme enhancements, several custom modules for additional features, and implementation of a one-step checkout for improved user experience.

Form360 App (ReactJS + LaravelAPI)

Built a web application for vehicle service management using React.js for the frontend and Laravel for the backend API, enabling efficient tracking and management of vehicle service operations.

Note: Worked on several other projects involving Magento 2, Laravel APIs, and React.js interfaces across e-commerce and web platforms.
