PROFILE

Backend Developer with **3+ years of professional & freelance experience** in **Laravel, Node.js, and MERN stack**. Built and deployed solutions like **Smart Chokidar, HRMS, and jewelry e-commerce platforms**, focusing on **scalability, security, and performance**. Passionate about solving real-world problems with clean, efficient code. Graduated from **L.D. College of Engineering, Ahmedabad (2020–2024)** CGPA - 7.2.

Skills & Technologies: PHP, JavaScript, Python, C++, Laravel, Node.js, Express.js, React, Next.js, Tailwind, Bootstrap, MySQL, MongoDB, SQLite, AWS (EC2), Linux, Git/GitHub, VSCode, Postman, Figma, REST APIs, JWT, SMS & Google APIs

EXPERIENCE

Headway Business Solutions – Jr. PHP Developer

Jan 2025 – Present | Ahmedabad, India

- Developed and deployed projects from scratch including Smart Chokidar, HR Management System, and Jewellery E-commerce platform.
- Built and optimized scalable APIs, implemented authentication/authorization, and integrated 3rd-party services.
- Maintained and enhanced the Headway main website, fixing critical bugs and improving Admin Panel performance.
- Collaborated with cross-functional teams to deliver custom backend solutions for multiple business clients.

Freelancer – Full Stack PHP Developer

2021 – Present | Remote

- Delivered small to medium-scale projects ranging from website builds to API integrations and backend systems.
- Provided ongoing maintenance and bug fixes for client applications, ensuring reliability and security.
- Worked with diverse stacks including Laravel, WordPress, MERN, and custom PHP solutions.
- Built long-term relationships with clients by delivering tailored solutions and meeting project deadlines.

PROJECTS

Smart Chokidar – Housing Society Management Platform (Jan 2025 - Apr 2025)

[Link](#)

Responsibilities: Developed the backend for a housing society management app using PHP Laravel, focusing on security and visitor entry. Delivered secure APIs for mobile (iOS, Android) and React-based systems, handling authentication, real-time notifications, SMS integrations, and visitor access control. Configured AWS infrastructure and managed server setup for scalable deployment.

Tools and technologies: PHP, Laravel, MySQL, JavaScript, RESTful APIs, JWT, SMS Gateways, AWS EC2, Google Firebase

Jewellery E-commerce Website (Feb 2025 - Apr 2025)

Responsibilities: Built the backend for a jewellery e-commerce platform using the MERN stack, creating efficient APIs for admin panels and customer-facing shop sites. Integrated third-party jewelry data store management APIs for seamless product syncing, alongside enabling order processing and secure payment systems.

Tools and technologies: Node.js, Express.js, MongoDB, JavaScript, RESTful APIs, Third-Party APIs, React Integration

HR Management System (July 2025 - Sept 2025)

Responsibilities: Designed and developed a complete HR management system independently with Next.js frontend and Laravel backend. Implemented Spatie roles & permissions for secure access control. Built modules for payroll, attendance, employee records, and admin dashboards, ensuring scalability and maintainability.

Tools and technologies: Laravel, Next.js, MySQL, PHP, JavaScript, Spatie Roles & Permissions, RESTful APIs, Tailwind CSS, AWS

Headway Main Website (Mar 2025 - July 2025)

[Link](#)

Responsibilities: Developed new APIs in the latest Laravel version and maintained backward compatibility with existing systems. Fixed critical issues and optimized the Admin Panel for improved performance. Collaborated with teams to deliver feature updates and enhance overall system stability.

Tools and technologies: Laravel, PHP, MySQL, JavaScript, RESTful APIs, Admin Panel Debugging, GitHub, AWS
