Professional Experience

Asthavinayak Soft-Solution - Remote

Webmaster (April, 2022 to Present)

- Design, develop, and maintain websites for a diverse range of clients, ensuring high performance and user-friendly interfaces.
 - Collaborate with clients to understand their requirements and provide tailored web solutions.
 - Manage server configurations and perform optimization tasks across multiple panels including WHM, cPanel, and Webmin.
 - Handle server-side issues, including troubleshooting, performance monitoring, and implementing security measures.
 - Ensure smooth hosting management, addressing client needs for uptime, scalability, and reliability.
 - Implement backup and disaster recovery strategies to ensure data protection and minimize downtime.
- Executive Assistant – Business Development

Independent Projects

1) Plugin Name :- Wordpress post to Image

- Auto Story Image Generator
- Custom Background Support
- Post Content Integration
- Personalized Name & Photo Overlay
- Featured Image, Title & Description Merge
- Live Story Preview
- Mobile-Responsive Output
- Instant Download & Share
- Lightweight & Optimized
- Native WordPress Media Uploader
- High-Quality Image Rendering

2) Android Kiosk Application Development (6 Apps) – Museum, Dahod

- Full-screen kiosk mode with restricted system access.
- Developed multilingual support (English + Gujarati) with easy language switching.
- Tailored user interfaces suitable for touch displays.
- Offline-first architecture ensuring functionality without internet connectivity.
- Integration of multimedia elements (images, videos, audio, text).
- Auto-launch and auto-restart features for continuous public use.
- Custom navigation flow for structured visitor interaction.
- Optimized performance for long-running use in public environments.
- Simple, easy-to-maintain backend configuration.
- Consistent UI/UX across all six applications for branding and ease of use.

3) AR Image Tracking Project – Eskuly Education

- Developed a large-scale AR image tracking system for 200+ educational images.
- Implemented high-accuracy marker-based detection for fast and reliable recognition.
- Integrated interactive 3D models, animations, and educational content on top of tracked images.
- Ensured smooth and stable tracking even in varied lighting and camera angles.
- Optimized project performance for low-end to high-end devices.
- Designed a structured image database for efficient target management.
- Used Unity + Vuforia (or your AR engine) to build a scalable AR experience.
- Created a user-friendly interface suitable for students and educators.
- Ensured offline compatibility for uninterrupted classroom usage.
- Delivered a stable, production-ready AR solution with 200+ learning assets.
