App-initioal Technology	Ahmedabad, Gujarat
Web Developer	January 2025 - Present
• Participated in design and new development of next generation IT application • Developing and creating PHP, MYSQL application as per the specifications. • Participated in sprint planning, daily stand ups, and retrospective meeting as part of Agile Development team • Currently expanding front-end development skills by learning and applying React.js, with the goal of building dynamic, responsive user interfaces and enhancing full-stack development capabilities	

Education

Saurashtra University	Bachelor Of Science (Inforamtion Technology) • 7 GPA
Rajkot,Gujarat	2019 to 2022
Gujarat Board	Science • 70 percentage
Upleta,Gujarat	2017-2018

Projects

Online shopping	March - 2019
Online Shopping Store Management System with HTML and CSS, utilizing PHP for data storage. Implemented responsive design for an author using a web browser, add it to their shopping cart	
Barber Shop	January 2025 - Present
A barber shop appointment booking system with worker leave management and project description would involve a software application to manage appointments, track staff availability, and handle employee leave requests. This system could be a mobile app or a web-based platform. It would streamline the booking process for clients, improve staff scheduling, and provide an organized way to manage leave requests and availability.
