

NIMIT SHAH

nimitshah126@gmail.com nimitshah.432@icloud.com 9512406960 Gujarat, India

OBJECTIVE

Professional WordPress Developer (PHP) with expertise in WordPress core, custom themes, custom plugins, PHP development, MySQL database management, JavaScript, jQuery, AJAX, REST APIs, WooCommerce customization, performance optimization, security hardening, SEO-friendly development, responsive UI, and cross-browser compatibility. Proven ability to analyse requirements, troubleshoot issues, and deliver high-quality, scalable web applications using industry best practices.

SKILLS

- **Content Management Systems:** WordPress (Custom Themes & Plugins, Hooks & Filters, REST API, WooCommerce Customization)
- **Backend Development:** PHP, MySQL, Object-Oriented Programming (OOP), CRUD Operations, API Development & Integration
- **Frontend Development:** HTML5, CSS3, JavaScript, jQuery, Bootstrap, Responsive Web Design
- **JavaScript Frameworks:** Vue.js (Component-Based Development, API Integration)
- **Content & Documentation:** Content Writing, SEO Content Structuring, Technical Documentation
- **AI & Automation:** AI Integration in Hardcore coding
- **Tools & Practices:** Performance Optimization, Website Security, Debugging, Cross-Browser Compatibility, SEO-Friendly Development
- **Soft Skills:** Communication, Problem Solving, Leadership, Active Listening, Team Collaboration, Confidence

PROJECTS

- **Streamit** is a sleek, responsive WordPress theme for OTT platforms, ideal for streaming movies, shows, tutorials, and podcasts. It features stunning UI/UX, front-end pages, admin panel, ratings, user lists, and ready-made login and pricing pages. Easily add shows or movies with smooth navigation and full mobile adaptability.
- **KiviCare** is the simplest self-hosted clinic and patient management solution based on WordPress platform. Setup your online clinic instantly. KiviCare is a result of 3 years of development. It's one and only Medical EHR solution on WordPress built with VUE JS for pure MAGICAL EXPERIENCE.
- **Serving Paws:** Designed and developed a user-friendly web application focused on supporting and managing services for stray animal welfare. Implemented secure payment gateway integration to enable online donations, ensuring smooth, reliable, and secure transaction handling. Emphasized usability, accessibility, and responsive design to deliver an intuitive user experience across multiple devices. Applied modern frontend best practices and structured development workflows to support real-world operational requirements.
- **Software Engineering** Website Template: Developed a fully responsive custom website template using HTML5, CSS3, JavaScript, and Bootstrap. Ensured cross-browser compatibility, mobile responsiveness, and optimized layout structure for consistent performance across devices. Implemented reusable UI components and clean, maintainable frontend code to improve scalability and long-term maintainability.

PROFESSIONAL EXPERIENCE

09/2025 – Current: Associate WordPress Developer at STEMpedia

- Completed learning AI driven courses.
- Managed end-to-end WordPress content operations for multiple company websites, including publishing, updating, and maintaining production content.
- Ensured SEO-friendly structure, proper formatting, and consistency across all web pages.
- Supported backend development tasks using PHP and MySQL, while maintaining site stability and performance.
- Identified and resolved website issues related to layout, functionality, and plugin conflicts.
- Actively upskilled through AI-powered courses to adopt emerging technologies and improve development efficiency.

06/2024 – 08/2025: Associate Software Engineer at Goldenmace IT Solutions

- Owned end-to-end development and maintenance of WordPress-based products (Streamit & KiviCare) using PHP, MySQL, JavaScript, jQuery, AJAX, and WordPress REST API.
- Implemented custom WordPress features, backend logic, and database-driven functionality to enhance system performance and scalability.
- Built and consumed RESTful APIs for secure communication between frontend interfaces and backend services.
- Executed custom plugin and theme-level modifications, ensuring clean code, maintainability, and WordPress coding standards.
- Provided technical support, troubleshooting, and client onboarding, resolving issues related to WordPress core, plugins, and integrations.
- Led version updates, security patches, and performance improvements, maintaining product stability across production environments.

12/2023 - 06/2024: Winter Internship at Goldenmace IT Solutions

- Built a strong foundation in PHP development, including core syntax, control structures, data types, and Object-Oriented Programming (OOP) principles.
- Implemented CRUD operations using PHP & MySQL, supporting dynamic, database-driven web applications.
- Gained hands-on experience with WordPress architecture, including template hierarchy, themes vs plugins, and WordPress core concepts.
- Developed custom functionality by integrating PHP within the WordPress environment, following WordPress coding standards and best practices.
- Utilized WordPress core functions, hooks, and filters to extend and customize platform functionality.
- Worked extensively with the Streamit WordPress theme, understanding its structure, features, and real-world use cases for streaming platforms.
- Assisted in customer support and technical troubleshooting for Streamit, resolving issues related to setup, configuration, and functionality.
- Mentored and trained new interns, supporting onboarding, technical learning, and workflow adoption.
- Took on independent responsibilities, demonstrating reliability, ownership, and problem-solving ability.
- Transitioned to working with the KiviCare WordPress plugin, gaining insight into its architecture and healthcare-focused workflows.
- Learned how Vue.js integrates with PHP and WordPress, enabling dynamic and responsive user interfaces within plugin development.
- Acquired in-depth understanding of custom modules, database interactions, and real-world clinic management systems within the KiviCare ecosystem.

05/2023 - 07/2023: Summer Internship at Goldenmace IT Solutions

- Built a strong foundation in front-end web development using HTML5, CSS3, and JavaScript.
- Applied UI/UX and web design principles, including layout structure, color theory, and usability best practices, to improve user experience.
- Developed and modified responsive web templates, ensuring cross-device and cross-browser compatibility.
- Implemented mobile-first and responsive design techniques to enhance accessibility and performance across different screen sizes.
- Assisted in testing, debugging, and refining front-end components for improved visual consistency and interaction.
